MCL-Agent 4.40 Update Packages

Package Details

Package #	<i>MCL-Agent</i> Version	Release Date	Scope
<u>P01</u>	4.40.0.36997	03.07.2026	All <i>Android</i> supported Devices

MCL-Agent 4.40.0.36977 Update (P01)

New Features

- *MLoader*: (Only applies to an *MCL-Mobility Platform* with an integrated *Google Enterprise*) New component available in the *Google Play* app store, that is responsible for the automatic installation of the *MCL-Agent* which is necessary for the initial enrolment into a *Google Enterprise*/pairing into *MCL-Mobility Platform*.
- *System*: Now, *MCL-Agent* supports *AMAPI (Android Management API)*, a *Google* service part of *Google Enterprise*. *Google Enterprise* can, now, be integrated in an *MCL-Mobility Platform* account to further manage *Android* devices.

Bug Fixes

- *Deployments*: Fixed stability issues in the *Package Installation and Recovery Services* when the component to deploy is a package (".pdk2", ".apk", ".cab2 or ".msi").
- *Messagebox Service*: Fixed stability issues in the *Queue Read Error Timeout* protection.
- *System*: Fixed issue that prevented the *MCL Lic* file from being removed from the device after a *Device Unpairing*.
- *System*: Fixed issue that prevented *MCL-Agent* from reporting "Location" system information (provided by the network used by the device), in addition to the *GPS* data (latitude and longitude).
